Doctoral Colloquium on research methods
28 April 2002, Reading, United Kingdom

A Doctoral Colloquium is to be held as a prologue to the European Conference on Research Methods (29-30 April 2002). The colloquium is intended for researchers working on their doctorates in the area of Business and Management Studies. There are two main benefits to be obtained from attending this Doctoral Colloquium. The first set of benefits is to help doctoral candidates improve their understanding of the subject issues and the methodologies available to them as Business and Management Studies researchers from the point of view of improving their doctoral work. The second area of benefits provides assistance to those intending to submit papers for possible publication in academically refereed journals.

The day commences with presentations from experienced academics that will address these two subject areas. These will be followed by short presentations from the Doctoral Colloquium participants. These talks are optional and their duration will depend on how many individuals wish to present. At the end of the afternoon there is a panel discussion, providing an opportunity for the Doctoral Colloquium members to ask questions.

Research topics that would be relevant for presentation by doctoral candidates at this colloquium include, but are not limited to, general management, business policy, business and management strategy, information systems management, marketing and sales management, HR issues, e-Government and other public service sector issues, health
services management and informatics, e-Learning, knowledge management, leadership studies, operations management, workgroups, etc.

A number of experienced academics from the colloquium panel will be present selected from Professor Arthur Money, Henley Management College, Professor Roy Williams, Reading University, Ann Brown, City University Business School, Dr Frank Bannister, Trinity College Dublin, Dr Carole Brooke, Reader, University of Lincoln, Professor Egon Berghout, Groningen University, Netherlands.

Anyone interested in attending should contact Professor Dan Remenyi on dan.remenyi@tcd.ie
